

Instant Messaging and Presence Quick Reference

First 5 minutes: Sign in and get started

- 1 Click your presence status to change it, or click **Reset Status** to let Lync 2010 set your status automatically based on your activity or Outlook calendar.

- 2 Set a location to let people know where you are today.
- 3 Let them know what you're up to by clicking **What's happening today?** and typing a note.

What does your presence state mean?

 Available	You are online and available for contact.
 Busy	You are in a Lync phone call or, according to your Outlook calendar, you are in a meeting.
 Do not disturb	You don't want to be disturbed and will see conversation alerts only if they are sent by your Workgroup contacts.
 Be right back	You are away briefly and will return shortly.
 Away	Your computer has been idle (for 15 minutes, by default).
 Off Work	You are not working and are not available to contact.
 Offline	You are not signed in. If you have blocked individuals from seeing your presence, you'll always appear offline to them.
